Parameters

Teaching is really good

Clear doubts with practicals

No any suggestion

Nothing

Overall it is good

No but improving the off lectures

Take extra time for practical

Development

Improve /Focus on more practical instead of theory

There is no need.

There should be more lectures in computer lab

We should be able to borrow more than 2 books per student from the library. And they need to issue books of latest edition. There are hardly few copies of latest edition among 100's of students, making it difficult for others to get those books.

Nothing all is good. No need to improve. Thank you

Projects and activities for extra development.

There is no sports activity for maintaining physical health

Yes

Ok

Take more project

Computer lab improvement

APD is very good subject for brain improvement so please add this subject in syllabus

APD is very good subject for brain improvement so please add this subject in syllabus

It's is excited

There should be extra curriculum activity..

APD is very good subject for brain improvement so please add this subject in syllabus.

There should be a overall secretary to manage events and sports.As it will improve leadership and management skills

Try to focus on studing about innovative studies an imtrapunarship

APD is very good subject for brain improvement so please add this subject in syllabus.

APD is good subject this subject helps to solve problems please add this subject in regular syllabus

It's good

APD is very good subject to solve the problem PIZ add the subject in syllabus

Request that the college should complete till 2pm and if break is canceled than its ok

-
Give more practical knowledge than making do donkey work

More co-curricular activities and fests should be included to enhance our skills.

More co-curricular activities and fests should be included to enhance our communication skills

I like to do improvement in study material

College should organize different types of cultural events

The current college is making learning as a mandatory it's not interesting and exciting feels like a military, you just have to follow orders and do what is told, which stagnates the skill growth and it just feels like we can do everything just for a certificate that reads you have completed this degree

Currently everything is up to the mark

Please give Notes on Google classroom of on going chapter while it's being taught. It's easier for students to quickly read the notes & understand better. We also get more time to study the notes well. Posting the notes on Google Classroom around 1 month before exams makes it Hectic for us to study every subject!! Please consider this

A lecture here is of 40 minutes and most of professors teach for about 5-10 minutes and rest of the time is used them dictating and Students writing. Need to improve this and help student build skills

More activity based things should be carried out

More strict attendance

Overall Good

Online exam are more productive and good for student so please take online exam

The curriculum should be more practical and requires more skillful subjects .

must improve

Good College

Internship n job should be provided by college

Get more practical

The management of the colleges not good so it should be improve and also lectures are not in the systematic way like anyone comes and teach whenever they want. Also practicals are for name there is nothing to learn new. And important thing that some professors don't teach good, students even can't understand the point they teach. So of them starts the projector any play an YouTube video of the study point, if we have to study from the YouTube only then why we have taken admission?.

Lastly only I wanna say that all the things that I have written is my personal opinion.
