Suggestions for improvement in curriculum design and development

Skills Over Facts: Focus on practical, real-world skills instead of memorization. **Blend & Connect:** Integrate subjects to create a more cohesive and engaging learning experience. **Tech Savvy:** Keep the curriculum current with emerging technologies like AI and data science. **Flexible Paths:** Offer modular courses that allow students to tailor their education to their goals. **Evolve & Adapt:** Continuously update the curriculum based on feedback and industry trends

Assignment submission should be taken before one month of exam
