

Workshop on Statistics using MS-Excel in Architectural Research

Rigorous statistical analysis is a mandatory requirement for any quality research study. Researchers should think about their research from statistics lens from the start, and not as an appendix to be added towards the end. Researchers generally state need for some specific statistical analysis software without justification, whereas MS-Excel is a ubiquitous statistical analysis software available to them. This workshop will address these scenarios by introducing descriptive and inferential statistics using Ms-Excel. **Workshop on Statistics using MS-Excel for Researchers from Architecture Domain to facilitate researchers from varied research interests, to integrate statistical analysis in their research projects is organized by BVDU's College of Architecture, Pune in collaboration with BVDU's Statistical Support Cell for Researchers**

EVENT DETAILS:

- **Date:** 24th September 2022
- **Day:** Saturday
- **Time:** 9:00 am to 5:00 pm
